### **DETAILED ACTION**

This Office Action is in response to the Preliminary amendment filed January 10, 2005. As directed by the amendment, claims 5, 8, 14, 21, 25-27, 29, 31, 34, and 36-40 have been amended and claims 43-44 have been cancelled. Thus, claims 1-42 are pending in this application.

#### ***Lack of Unity***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-41, drawn to a device.

Group II, claim(s) 42, drawn to a method of delivering a substance.

The inventions listed as Groups I & II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I & II are linked together as they share the same technical feature, namely the device as claimed in claims 1 & 41 which is a delivery device with a gas chamber containing a gas and being of reducible volume, wherein a reduction in the volume of the gas chamber to a predeterminable volume acts to pressurize the contained gas to a predeterminable pressure, whereupon a gas flow from the gas chamber acts to deliver substance from the delivery outlet.

However, this feature is not a special technical feature as the device of claim 1 and 41 is known, as taught by Brunet et al., (CA 2,020,425 A1). See: page 5, lines 11-38 and Figure 1. Thus, unity of invention is lacking because there is no “special technical feature” uniting Groups I & II, since the technical feature uniting the claims does not make a contribution over the prior art.

### ***Election of Species***

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species I, Figures 1-10 & 21-24;

Species II, Figures 11-14 & 25-26;

Species III, Figures 15-16;

Species IV, Figures 17-18;

Species V, Figures 19-20;

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Currently claims 1 and 41 are generic.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of either a device or a method of using a device and a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
